EV chargers are only valuable when drivers can actually use them. With VizioPark, operators gain real-time visibility of charging spot availability, prevent misuse by non-EVs or overstaying cars, and ensure a seamless charging experience that boosts revenue and customer satisfaction

Real-time availability

See instantly which charging spots are free or occupied.

Prevent misuse

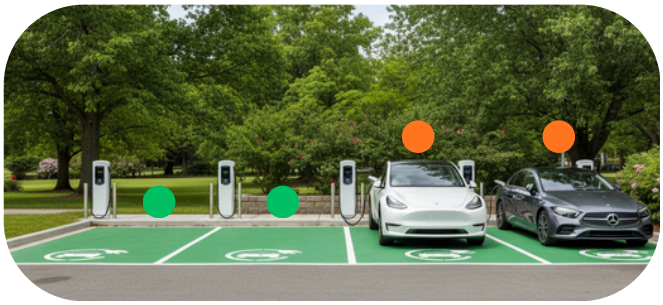
Get alerts when non-EVs or idle cars block charging stations.

Boost revenue & efficiency

Maximize turnover of charging spots and increase station profitability.

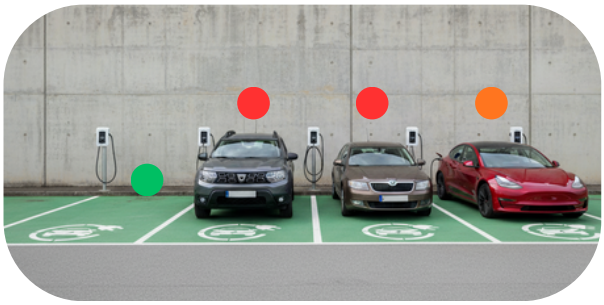
Enhance driver experience

Offer reliable charging access, reduce frustration and build loyalty.



Detect the real-time availability

Operators can provide drivers with accurate, real-time updates on charging spot availability.
This helps EV users plan their journeys with confidence, reducing unnecessary detours and waiting times.



Detect Overstay and Misuse

Blocked or overstaying vehicles reduce turnover and frustrate paying customers. VizioPark detects misuse in real time and alerts operators, helping you enforce fair usage, increase charging efficiency, and protect your investment.

Solutions for every sector

Gas stations

Municipalities

Shopping centers

Office buildings
