VISIOTEK.TRACK

**Redefining counting with AI
and unparalleled privacy**

The most reliable counting sensor on the market

**Real-time people &
vehicle counting**

**Classified and
directional counting**

**Line crossing or area
counting methods**

**Alerts on defined
event or threshold**

Applications

**Queue
Management**

**Urban
Planning**

**Mobility
Study**

**Smart
Lighting**
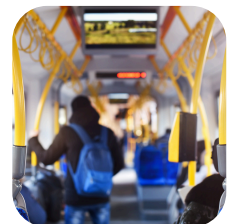

Industries

Municipalities

**Smart
Buildings**

Retail

**Public
Transportation**

VISIOTEK.TRACK

Leading the way to smart mobility & sustainable environment

Enhancing Urban Mobility: Counting, Safety, and Flow Optimization

Multimodal counting
Enable precise mobility studies with comprehensive counting of vehicles, cyclists, and pedestrians

Risk prevention
Identify and mitigate hazards for pedestrians and two-wheelers

Traffic flow Optimization
Refine traffic plans to enhance flow and reduce congestion

Easy to integrate
Compatible with all platforms thanks to a simple API

Traffic and urban planning optimization

City accessibility
Understand travel to prepare your developments, plan intrastructures...

Public transports management
Optimize services according to real needs: schedules, routes, capacity

Public lighting control
Optimizing energy consumption by adapting lighting intensity to activity levels
