
VISIOTEK.YARD

Transform logistics processes with intelligent sensors

A high-performance logistics sensor on the market

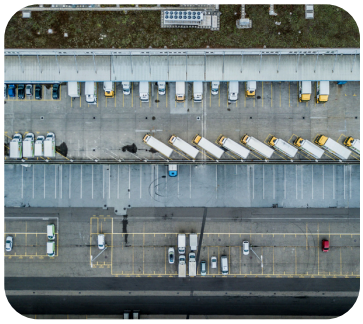
- Real-time occupancy and alerts
- Dock parking time
- Occupancy rate and detailed analysis
- For all types of trucks and trailers

Applications

Loading and unloading dock management

Trailer parking management

Highway rest areas



Entry/exit analysis and fleet management

Ports and freight rail terminals

Flow and stock management

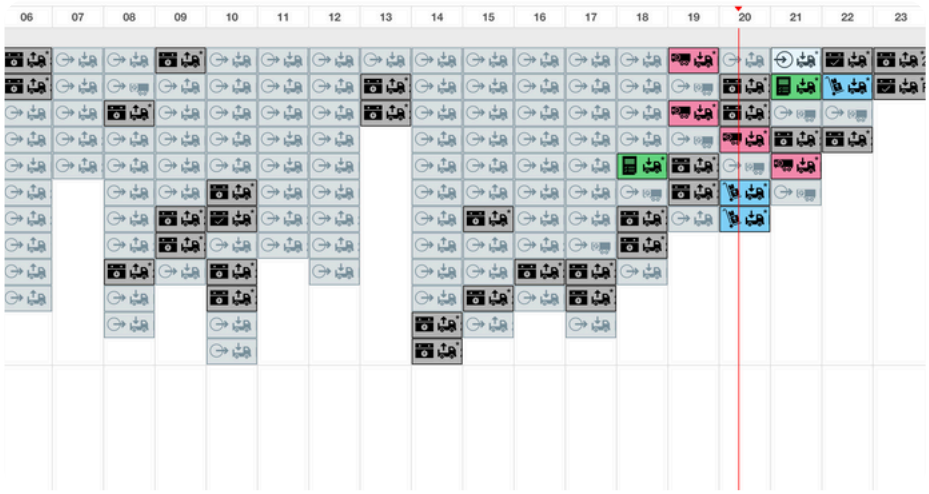
Toward a smarter logistics environment

Optimize your logistics processes with artificial intelligence



Time optimization
Save time for drivers by reducing the search for available spaces and optimizing time for flows and logistics processes.

Better efficiency
Improved overall efficiency by facilitating decision-making through statistics, alerts, and dock/parking occupancy rates.

Increased productivity
Better organization and flow management reduce downtime, thus increasing operational capacity and site profitability.

A smarter logistics environment

Improved driver safety
Optimized allocation of docks/parking spaces to reduce accident risks, ensuring a safer environment for drivers.

Fast ROI guaranteed
A quick return on investment by optimizing logistics processes with innovative solutions.

Easy to integrate
Compatible with all platforms through a simple and secure API.
